

## **BRAY WARE QUARTER TURN TAP & QUARTER TURN WRENCH**

Bray ware tap ware is new technology that when installed the bray washer compresses and expands out sealing the side walls, this is a new concept. When a plumber changes a tap washer, they reseal the breach (shaving) where the washer seals, but what you're losing in the brass seat is gaining a side wall.

Tap wrench is the first tool design especially made for quarter turn tap installation. Quarter turn Wrench is a first tool design for tap ware.

MARKET: 100,000 Registered Plumbers in Australia.

Every house built before the year 2003, 7 million homes may have up to 5 breaches.  
Plus commercial motels,hotels,hospitals,schools,sports centers, ect.  
Every breach will fail and need replacing.  
Bray ware stops having to replace the wall breach.
